

Catch::Session::Session

Catch::makeCommandLineParser

Catch::isColourImplAvailable

```
graph LR; A[Catch::Session::Session] --> B[Catch::makeCommandLineParser]; B --> C[Catch::isColourImplAvailable];
```

The diagram illustrates a sequence of three components in a flowchart. The first component, 'Catch::Session::Session', is in a white box. A blue arrow points to the second component, 'Catch::makeCommandLineParser', which is also in a white box. Another blue arrow points from the second component to the third component, 'Catch::isColourImplAvailable', which is in a gray box. The boxes are arranged horizontally and connected by arrows pointing from left to right.
