

std::true_type

B1

Catch::Detail::conjunction< B1 >

```
graph BT; C[Catch::Detail::conjunction< B1 >] --> T[std::true_type]; C --> B[B1];
```

The diagram illustrates a relationship where the type `Catch::Detail::conjunction< B1 >` inherits from or specializes both `std::true_type` and `B1`. This is represented by two arrows originating from the bottom box and pointing upwards to the two boxes above it.
