

Catch::ExprLhs::operator&&

Catch::ExprLhs::operator||

Catch::ExprLhs::ExprLhs

```
graph LR; A[Catch::ExprLhs::operator&&] --> C[Catch::ExprLhs::ExprLhs]; B[Catch::ExprLhs::operator||] --> C;
```

The diagram illustrates a relationship between three functions. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Catch::ExprLhs::operator&&' and the bottom box contains 'Catch::ExprLhs::operator||'. On the right, there is a gray rectangular box with a black border containing the text 'Catch::ExprLhs::ExprLhs'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'operator&&' and 'operator||' are related to or perhaps overloaded versions of the 'ExprLhs' function.
