

Catch::Optional::operator bool

Catch::Optional::operator==

Catch::Optional::some

```
graph LR; A[Catch::Optional::operator bool] --> D[Catch::Optional::some]; B[Catch::Optional::operator==] --> D;
```

The diagram illustrates a relationship between two operators and a method. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Catch::Optional::operator bool' and the bottom box contains 'Catch::Optional::operator=='. On the right, there is a gray rectangular box with a black border containing the text 'Catch::Optional::some'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box. The top arrow starts from the right side of the 'Catch::Optional::operator bool' box, and the bottom arrow starts from the right side of the 'Catch::Optional::operator==' box.
